Designed and produced in Italy

Ogni nazione ha il suo marchio distintivo che caratterizza i propri prodotti e li fa risaltare per le loro caratteristiche esclusive. È così che il Made in Italy è sinonimo di eccellenza della creatività e della maestria. Uno dei settori dove questo è riconosciuto come valore consolidato e indiscutibile è il settore dell'interior design. Fit Interiors opera in questo settore, ormai da diversi anni, attraverso una propria struttura manifatturiera e produttiva in Italia, nello stabilimento di Longiano, in Emilia Romagna. Nata nel 1978 come azienda di produzione di mobili, negli

anni successivi ha creato una struttura commerciale con la nascita del brand e la commercializzazione dei suoi prodotti. Oggi è leader nel mercato dell'arredamento per palestre, centri benessere, SPA e più in generale nelle aree di ricevimento e spogliatoio per hotel, aziende, cliniche, ospedali, università e scuole. Il suo obiettivo è quello di portare in tutto il mondo l'eccellenza del design e della qualità produttiva italiana in questi settori, con un'attenzione particolare ad ogni necessità di personalizzazione dell'utente.

Each country has its own distinctive brand that characterises its products and makes them stand out for their exclusive characteristics. This is how Made in Italy is renowned for excellence in creativity and craftsmanship. And most definitely so, in the field of interior design. Fit Interiors has been active in this business for many years now, with its factory located in Longiano, Italy. Founded in 1978 as a general furniture manufacturer, the company

then created a sales structure, and started marketing its products under the Fit Interiors brand. Today, it is a leading brand in health club and spa decoration, and more generally, in reception area and changing room furniture for hotels, corporate, clinics/hospitals, schools/universities. Our mission is to spread Italian design and production excellence everywhere, with specific focus on customisation and personalisation.

Sistema modulare

- Pareti divisorie fissate con due morsetti alla parete di fondo, piedino a terra, morsetto al tubo strutturale superiore.
- Ante dotate di sistema di apertura a bilico con ritorno automatico, costituito da: piedino fissato a terra, morsetto ammortizzato fissato al tubo strutturale superiore.
- Tubo orizzontale per l'ancoraggio superiore di pareti divisorie e ante, con supporti terminali fissati a parete.

Materiali

- Laminato HPL stratificato, spessore 10 mm, classificato come pannello autoportante con reazione al fuoco Euro classe Bs1-do e rilascio formaldeide classe E1, con angoli raggiati e bordi perimetrali bisellati
- Vetro temperato stratificato con pellicola PVB colore a scelta, spessore 5+5 mm, trattamento termico HST (Heat Soak Test), con angoli raggiati e bordi perimetrali bisellati.
- La specifica ferramenta strutturale, interamente disegnata da fit interiors, è realizzata in alluminio estruso o lavorato al tornio. Il morsetto superiore per anta è ammortizzato tramite alette in acciaio armonico.

Modular system

- Partition walls fixed with two clamps to the back wall, foot on the ground, clamp to the upper structural pipe.
- Doors equipped with pivoting opening system with automatic return, consisting of: foot fixed to the ground, shock-absorbing clamp fixed to the upper structural tube.
- Horizontal tube for upper anchorage of partition walls and doors, with end supports fixed to the wall.

Materials

- HPL laminate, thickness 10 mm, classified as self-supporting panel with reaction to fire Euro class Bs1-do and formaldehyde release class E1, with rounded corners and bevelled edges
- Laminated tempered glass with PVB colour film of choice, thickness 5+5 mm, HST (Heat Soak Test) heat treatment, with rounded corners and bevelled edges.
- The specific structural hardware, entirely designed by fit interiors, is made of extruded or lathe machined aluminium. The upper sash clamp is cushioned by harmonic steel fins.

Eha-Mat

Get Fit

location: Milan, Italy
project: arch. Livio Leardi / Fit Interiors

EHA-MAT è prodotto in uno speciale materiale sintetico con caratteristiche batteriostatiche e fungicide. Evita pertanto la proliferazione di microorganismi. E' facilmente lavabile ed offre un'altissima resistenza agli agenti chimici. Il materiale antiscivolo in cui è prodotto garantisce una tenuta ottimale sia sulla pavimentazione che sulla parte superiore a contatto con gli utenti. La trama a grata consente un immediato deflusso dell'acqua. Risponde alle norme di sicurezza antiscivolo tedesche GUV N.2617/DIN 51097 (test Gruppo A).

Il materiale ad altissima resistenza con cui è prodotto garantisce ad EHA-MAT una durata pressoché illimitata, sia dal punto di vista dei colori che da quella del degrado del materiale stesso.

EHA-MAT is manufactured in a special synthetic material with fungicide and bacteriostatic characteristics. It therefore avoids the proliferation of microorganisms. It is easily washable and offers very high resistance to chemicals agents. The anti-slip material guarantees an optimal seal on both the flooring and on the top part, in contact with the users. The grating pattern allows for an immediate outflow of water. It meets safety standards German anti-slip GUV No. 2617/DIN 51097 (Group A test). The very high strength material guarantees to EHA-MAT almost an unlimited lifetime, from both the point of view of the colors and that one of degradation of the material itself.
